General Findings

27: Tartar, Short-term Intervention

Can cause bad breath smell, inflammation to the gums and bleeding. It can also cause discoloration of teeth and bad appearance.

37: Caries, Short-term Intervention

Can grow to require more extensive treatments. An extensive loss of tooth structure due to untreated cavities can ultimately result in tooth loss.

46: Old filling, Short-term Intervention

Can reach the tooth nerve causing pain and sensitivity, requiring more extensive root canal treatment or crowns. It is also at the origin of bad breath.

47: Caries, Short-term Intervention

Can grow to require more extensive treatments. An extensive loss of tooth structure due to untreated cavities can ultimately result in tooth loss.
